DESCRIPTION

This product is designed to penetrate, lift and dissolve heavily encrusted soils on hard surfaces and for the removal of fats, greases, protein based soils, food residues and blood from all vertical and horizontal surfaces. It is especially useful in all food processing areas. Its high foaming properties allow it to cling to all surfaces, providing excellent emulsification. May be used on equipment, walls, tables, and floors. This formula is non-flammable, non-toxic and free-rinsing. May also be used in a variety of non-food related cleaning operations for heavy degreasing where high detergency and foaming are desired in cleaning applications.
